DETAILED ACTION

1. Applicants' preliminary amendment of 1/23/2006 is acknowledged. Claims 3, 5, 6, 12, 13, 14, 16 and 17 have been amended. Claims 1-18 are pending and under consideration.

Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 are drawn to a method for diagnosing wood decay.

Group II, claim(s) 9-18 are drawn to an agent and a kit.

3. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature-linking groups I-II appears to be an antigen-antibody reaction of contacting extract of wood to be examined with an antibody obtained from cultures of fungi causing wood decay.

However, Hirano et al. (Journal of Wood Science vol.46, pp.45-51, 2000) teach an antigen-antibody reaction of contacting extract of wood to be examined with an antibody obtained from cultures of fungi causing wood decay (see title and abstract). Therefore, the technical feature linking the inventions of groups I-II does not constitute a special technical feature as defined by the PCT Rule 13.2, as it does not define a contribution over the prior art. As set forth above, each of group I-II has a special technical feature that is not required for the other groups.

The special technical feature of group I is a method for diagnosing wood decay.

The special technical feature of group II is an agent and a kit.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Species Election

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. If applicants elect group I, then there is additional election of species.
 - 1a. please choose one of the species of fungi from claims 3, 4 and 5.
- b. If applicants elect group II, then there is additional election of species.
 - 1b. please choose one of the species of fungi from claims 10 and 11.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species are shown to be distinct because they are drawn to a plurality of disclosed patentably distinct species of structurally and functionally distinct fungi.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) is generic: 1 and 8.
